Aswin Kizhuppully Santhosh

Junior Software Developer — Python, Django, PostgreSQL

Ottawa, ON (343) 558-8853 aswinksanthosh000@gmail.com github.com/Aswinksanthosh
aswinksanthosh.github.io/github-portfolio Eligible to work in Canada

SUMMARY

Computer Programming graduate (Algonquin College) who builds backend systems, REST APIs and automation tools. Delivered a rule-based calendar automation system, a Django booking platform and a client HR tool in an Agile team. Seeking a junior developer role in Ottawa.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), SQL, PHP, HTML/CSS
Backend & APIs: Django, REST APIs, OAuth 2.0, Webhooks, n8n, Google APIs, Postman
Databases: PostgreSQL, MySQL, schema design, ETL, CTEs & window functions
Tools & Process: Git/GitHub, Linux, pytest, unit testing, Agile/Scrum, code reviews

PROJECTS

n8n Calendar Auto-Scheduler *Jan 2025 – Present*
Python, n8n, Google Calendar & Sheets APIs, PostgreSQL, OAuth 2.0, Webhooks
- Built an automation that converts all-day tasks into timed events, finding free slots in 15-minute steps and respecting buffers, time windows and rules.
- Two-way sync between Google Sheets and Calendar; dependency engine chains events (e.g. "Gym after Work") and reshuffles automatically.
- Webhook handler lets users finish, postpone or compress events in one click; PostgreSQL dashboard shows automation metrics; unit-tested with pytest.

BudgetBuddy — Hostel Booking Platform *Sep – Dec 2024*
Python, Django, PostgreSQL, Bootstrap, JavaScript, Stripe API
- Full-stack booking app with guest and admin roles, search, real-time availability calendar and Stripe payments.
- Rule-based dynamic pricing stored in the database; prevented double-bookings using transactions with select_for_update().
- Worked in an Agile team with sprint planning, code reviews and pytest unit tests.

CultureScreener — HR Screening Platform (OrgFitech Inc.) *Sep – Dec 2024*
WordPress, PHP, MySQL, JavaScript, AJAX, Elementor
- Agile capstone for a real client (NDA): built the Welcome page and Screening Dashboard.
- Wrote custom PHP and AJAX to pull data from MySQL; contributed to use case diagrams, ERD and deployment docs in a team of 4.

French Class Notes — Mobile Learning Site *2025 – Present*
JavaScript, PWA, Firebase Auth, Firestore, Web Speech API
- 60+ chapter mobile-first site with tap-to-hear audio, progress checklists, Google sign-in and cross-device sync. Live: aswinksanthosh.github.io/French-Notes

EXPERIENCE

Python Programming Instructor *Aug – Oct 2022*
Soften Technologies — Kerala, India
- Taught Python fundamentals and algorithmic thinking; helped students with projects and assignments.

Also: Concession Stand Lead (Aramark), Crew Member (McDonald's), Walmart, Amazon and Dal Moro's — customer service, teamwork and working under pressure.

EDUCATION

Advanced Diploma, Computer Programming — Algonquin College, Ottawa *Sep 2023 – Apr 2025*
Python Programming Certification, Soften Technologies *2022*
Diploma in Computer Science, K.K.M.M.P.T.C, India *2021*
